PROFILE

Final-year Computer Science student building production **AI agents, LLM orchestration platforms, and workflow automation** using **Python, n8n, FastAPI, LangChain, LangGraph, Twilio, and multi-LLM stacks** (Claude, GPT, Gemini, Groq, Mistral). Shipped three production AI applications including a voice-based appointment agent (Twilio + Whisper + GPT + ElevenLabs) and an ML forecasting platform trained on 180K+ data points across 98 tickers. AI-native developer working in Claude Code, Cursor, Codex, and Antigravity. Open to relocating to Bengaluru.

EDUCATION

B.Tech, Computer Science & Communication Engineering CGPA 8.38 / 10
Kalinga Institute of Industrial Technology Expected 2026

PROJECTS

AI Voice Appointment Agent · Autonomous voice agent on telephony
n8n · Twilio · OpenAI Whisper · GPT-4o · ElevenLabs · Google Calendar

- Engineered an **autonomous voice agent** that handles inbound and outbound appointment calls end-to-end — speech recognition, LLM-driven conversation, calendar booking, and natural-voice response — orchestrated through an **n8n workflow** across 6+ services.
- Designed the conversational flow: **Twilio** for telephony, **Whisper** for speech-to-text, **GPT-4o** for intent recognition and dialog management, **ElevenLabs** for natural TTS, and **Google Calendar API** for booking — with structured prompt engineering for context retention across multi-turn calls.

Cuemath Social Studio · Multi-LLM orchestration for content generation GitHub · Live
Next.js · Groq · Gemini · Mistral · FLUX · Canvas API

- Shipped a production **Generative AI application** that converts a single prompt into multi-slide social content (text + imagery) in under 30 seconds, backed by a **multi-LLM fallback chain** across Groq, Gemini, and Mistral for resilient inference.
- Built an **agentic image generation pipeline** with FLUX, retry logic, and CORS-safe Canvas API export to PDF/ZIP — demonstrating end-to-end ownership of an AI workflow from prompt to deliverable.

KronoX · ML forecasting platform with foundation model integration GitHub · Live
Python · Scikit-learn · PyTorch · Gradient Boosting · yfinance · Streamlit

- Architected a production **ML forecasting platform** integrating the Kronos foundation model (PyTorch) with Gradient Boosting in a **three-tier predictive fallback chain** (Kronos-mini → ML model → Linear); trained on **180K+ data points across 98 tickers** with backtesting via Sharpe ratio and drawdown metrics, plus a 7-step ETL pipeline for production-grade reliability.

TECHNICAL SKILLS

Languages	Python, SQL, C, JavaScript/TypeScript
AI & Agents	OpenAI (GPT-4o), Anthropic Claude, Gemini, Groq, Mistral, FLUX, LangChain, LangGraph, Prompt Engineering, RAG, Multi-LLM Orchestration, Agentic Workflows, Voice Agents (Twilio + Whisper + ElevenLabs)
Workflow Auto.	n8n, FastAPI, REST APIs, Webhook Integration, Workflow Orchestration
ML & Data	Scikit-learn, PyTorch, Pandas, NumPy, Gradient Boosting, Time-Series Forecasting, Statistical Analysis
Cloud & Deploy	AWS (EC2, S3, RDS, Lambda, IAM), Vercel, Streamlit Cloud
Vibe-Coding Tools	Cursor, Claude Code, Codex, Antigravity, OpenCode, Git, GitHub, VS Code

CERTIFICATIONS

- AWS Academy — Cloud Architecting
 - HackerRank — SQL (Basic)
- Google Data Analytics Professional Certificate
 - McKinsey Forward Program 2026

LEADERSHIP EXPERIENCE

Graphic Design Lead · Kalakaar Society — led cross-functional design delivery Sep 2024 — Present
Organizing Committee Member · KIITFEST 7.0 & 8.0 — multi-team event operations 2023 — 2025
