PROFILE

Final-year Computer Science & Communication Engineering student building production data, ML, and analytics systems with Python, SQL, and AWS.

EDUCATION

B.Tech, Computer Science & Communication Engineering CGPA 8.21 / 10
Kalinga Institute of Industrial Technology Expected 2026
Class XII: 78.6% · Class X: 84.8%

PROJECTS

KronoX · Time-series forecasting platform GitHub · Live
Python · Scikit-learn · yfinance · Streamlit

- Built an end-to-end stock forecasting system combining a Kronos foundation model with a gradient boosting ensemble, deployed to Streamlit Cloud with live inference.
- Trained ML models on 180K+ OHLCV candles with 20+ engineered features; implemented walk-forward backtesting reporting Sharpe ratio, max drawdown, and hit rate per strategy.

Cuemath Social Studio · LLM orchestration for content generation GitHub · Live
Next.js · Groq · Gemini · Mistral · FLUX

- Built a production web app that turns a single prompt into multi-slide social content — text, layout, and imagery — in under 30 seconds, backed by a multi-LLM fallback chain across Groq, Gemini, and Mistral.

Sales Performance Analysis · Executive analytics dashboard
Power BI · DAX · SQL · AWS · Vercel

- Analyzed 50K+ sales records and built interactive Power BI dashboards using DAX measures to track KPIs including Rs. 5M+ revenue and 15% YoY growth.
- Identified top products driving ~60% of revenue, surfaced seasonal demand patterns, and deployed the dashboard via AWS and Vercel for stakeholder access.

AutoMap-CVE · Automated vulnerability intelligence GitHub
Python · Nmap · CVE API · Jinja2

- Built a reconnaissance tool that ingests Nmap output, fingerprints services and versions, and correlates them against the public CVE corpus with severity metadata.
- Generated machine-readable JSON and human-readable HTML reports, collapsing the scan-to-triage loop from hours of manual lookup to seconds of automation.

TECHNICAL SKILLS

Programming	Python, SQL, C
Data & ML	Pandas, NumPy, Scikit-learn, Time-series forecasting, LLM orchestration, prompt engineering
Cloud	AWS (EC2, S3), Git, GitHub, Nginx
Analytics	Power BI, DAX, SQL, Excel, statistical analysis

CERTIFICATIONS

- | | |
|--|--|
| • AWS Academy — Cloud Architecting | • HackerRank — SQL (Basic) |
| • Google Data Analytics Professional Certificate | • IBM — Exploratory Data Analysis for ML |

LEADERSHIP

Graphic Design Lead · Kalakaar Society Sep 2024 — Present
Led a team of junior designers delivering cross-event creatives; built a repeatable visual system (posters, banners, merchandise) that established the society's identity.

Organizing Committee · KIITFEST 7.0 & 8.0 2023 — 2025
Coordinated logistics for one of the region's largest college fests (two consecutive years); led a 6-person team on an accessibility prototype.
